

# AT2XT Converter

Version 1.0

Last Updated: July 19, 2018

*SHIFT838* announces the new AT2XT Converter board!

The AT2XT Converter board converts AT keyboard scan codes to XT keyboard scan codes. This board is useful for connection newer AT type PS/2 keyboards to older PC's that require a XT keyboard.

This board is powered by a *PIC12F629* EEPROM with custom code to do the conversion.

Mode switch settings:   Open   = Normal operations  
                          Closed = E0 Mode

This board has been designed to fit inside a Hammond 1591XXL case. (not included)

5 pin DIN Socket = Output to XT PC Type machine

PS/2 Socket = Connect PS/2 Keyboard for Input here

Requirements to connect the board to your computer:

- PS/2 AT type keyboard (not included)
- Male to Male 5 pin DIN cable (MIDI cable - not included)
